What is *Family Connection*? Learn more...

Family Connection from Naviance Inc. is designed to help students make decisions about courses, colleges, and careers. Family Connection allows students get involved in the planning and advising process. In this site, students can build resumes, complete on-line surveys, and manage timelines and deadlines for making decisions about colleges and careers.

It is a powerful tool for students to engage in research for colleges, scholarships, and financial aid. In the near future, students will be able to compare GPAs, standardized test scores, and other statistics to actual historical data from Dougherty Valley for students who have applied and been admitted in the past.

It also acts as a bridge between students and counselors. Students can access information from the Counseling Department and College & Career Center (such as up-coming meetings and events, local scholarship opportunities, and

On the left, a sidebar lists four clusters: 'Education and Training' (1,012), 'Administration and Administrative Support' (1,010), 'Professional Support Services' (1,011), and 'Teaching and Training' (1,010). The main content area has tabs for 'Overview', 'Credentials', 'Related Careers', 'Related Majors', and 'Plan of Study'. **Overview**

There are many challenging educational and training opportunities within the high-skilled world of Education and Training. Learners need a solid background in academic, technical and presentation/facilitation skills. The educational background for a career in the education and training field can begin in high schools, technical colleges/institutes, and universities.

This diverse Career Cluster prepares learners for careers in planning, managing and providing education and training services, and related learning support services. Each year many learners train for careers in education and training in a variety of settings that offer academic instruction, career technical instruction, and other education and training services.

## Definitions

**Realistic:** Realistic occupations frequently involve work activities that include practical, hands-on problems and solutions. They often deal with plants, animals, and real-world materials like wood, tools, and machinery. Many of the occupations require working outside, and do not involve a lot of paperwork or working closely with others.

**Investigative:** Investigative occupations frequently involve working with ideas, and require an extensive amount of thinking. These occupations can involve searching for facts and figuring out problems mentally.

**Artistic:** Artistic occupations frequently involve working with forms, designs and patterns. They often require self-expression and the work can be done without following a clear set of rules.

**Social:** Social occupations frequently involve working with, communicating with, and teaching people. These occupations often involve helping or providing service to others.

**Enterprising:** Enterprising occupations frequently involve starting up and carrying out projects. These occupations can involve leading people and making many decisions. Sometimes they require risk taking and often deal with business.

**Conventional:** Conventional occupations frequently involve following set procedures and routines. These occupations can include working with data and details more than with ideas. Usually there is a clear line of authority to follow.
